

terrafiniti®

Dynamic sustainable teams

Build involved, action orientated teams to drive sustainability

Why take part?

Understand - how to identify and prioritise environmental and social issues and their business relevance.

Respond - develop best practice to reduce business costs, enhance relationships with customers and suppliers and reduce impacts.

Communicate – report your sustainability progress and credentials to staff and stakeholders.

Who is it for?

- ✦ Leadership and management teams considering the strategic threats and opportunities.
- ✦ Operational and functional teams delivering company policies and commitments (e.g. strategy or procurement).
- ✦ Staff in new CSR and sustainability roles or Green teams and sustainability champions who wish to boost their current level of awareness and understanding.

What will you get out of it?

- ✦ Practical, fact-based exploration of sustainability and implications for future business success.
- ✦ Tools, models and techniques to assess and prioritise sustainability issues.
- ✦ Insight into and use of leading techniques in sustainability management.
- ✦ A structured approach for putting sustainability at the heart of your business.
- ✦ Best practice advice and insight into engaging staff and stakeholders.

“Terrafiniti... have been instrumental in ensuring that I have been able to deliver value and realise new business opportunities for my organisations and their respective client bases.”

Jonathan Quigley, WWF International, World Economic Forum

Training structure

The programme includes three one-day workshops, remote support and group work.

Each workshop focuses on a specific sustainability theme and provides the opportunity to discuss key issues and explore them in a business context.

The workshops are tailored to your company and sector, highlighting sector specific initiatives and best practice - an example is shown on the right.
